

LAKSHITA

Data Analyst | Business Analyst | BI Analyst

India | Python • SQL • Power BI • Excel • Data Analytics

SUMMARY

MCA Data Analytics graduate with experience across **data analytics, Python development, and business development**. Skilled in **SQL, Python, Pandas, Power BI, Excel, data visualization, EDA, and business analysis**. Experienced in turning data into actionable insights through data cleaning, analysis, KPI reporting, dashboards, and applied machine learning. Strong ability to connect technical analysis with business requirements and decision-making.

EXPERIENCE

Python Developer Intern | The Developers Arena | Feb 2026 – Aug 2026

- Developed Python-based data-driven applications using **Python, Pandas, APIs, JSON, and databases**.
- Performed data cleaning, transformation, validation, debugging, and analytical processing.
- Built interactive data solutions using **Python and Streamlit** and used Git/GitHub workflows.

Data Analyst Intern | Cognifyz Technologies | Mar 2026 – Apr 2026

- Performed **data cleaning, preprocessing, EDA, statistical analysis, and visualization** using Python and Pandas.
- Identified trends, patterns, relationships, and business-relevant insights from structured datasets.
- Created analytical outputs and visualizations to communicate findings and support data-driven decisions.

Business Development Executive | SIXPL | May 2024 – Aug 2024

- Conducted **market and prospect research**, lead generation, and opportunity analysis.
- Analyzed prospect information to prioritize opportunities and support business growth.
- Built practical understanding of **customer needs, sales funnels, and commercial decision-making**.

PROJECTS

ApexF1 AI | Python • AI • Data Analytics

- Developed an F1-focused analytics platform combining structured racing data with analytical and AI-driven features for **driver, track, race, and championship insights**. Designed data-driven outputs to make complex information easier to explore and interpret.

Walmart Sales Dashboard | Power BI • SQL • DAX • Power Query

- Built an interactive sales dashboard analyzing **revenue, profit, products, regions, and time-based performance**. Developed data models, relationships, and DAX measures to track business KPIs and identify trends.

FedEx Logistics SQL Analysis | SQL

- Analyzed logistics and shipment data using **CTEs, JOINS, subqueries, aggregations, and window functions**. Evaluated operational patterns and performance metrics to generate business-focused insights.

GrowLift | Full-Stack • Product Development

- Built a data-driven product platform focused on **user needs, business workflows, and actionable information**, translating requirements into a functional end-to-end application.

RetentionIQ AI | Python • Pandas • Scikit-learn • Streamlit

- Built a customer retention/churn analytics solution using **EDA, feature engineering, and Random Forest**. Developed an interactive Streamlit application translating predictive outputs into actionable retention insights.

EDUCATION

Master of Computer Applications (MCA) — Data Analytics | JAIN (Deemed-to-be University) | 2024 – 2026

Bachelor of Computer Applications (BCA) — Computer Applications | 2021 – 2024

SKILLS

Technical: Python, SQL, Pandas, NumPy, Power BI, DAX, Power Query, Excel, MySQL, PostgreSQL, SQLite, Scikit-learn, Streamlit, Git/GitHub, APIs

Analytics: Data Analysis, EDA, Data Cleaning, Statistical Analysis, Data Visualization, KPI Reporting, Dashboard Development, Data Modeling, Predictive Analytics

Business: Business Analysis, Requirements Understanding, Market Research, Customer Analysis, Process Analysis, Problem Solving, Data-Driven Decision Making

Professional: Communication, Analytical Thinking, Critical Thinking, Stakeholder Collaboration, Teamwork, Time Management, Adaptability, Attention to Detail
