## MIS Executive

lak03shita@gmail.com | 9599395978 | Delhi/NCR | linkedin.com/in/lakshita-047439224 | github.com/stakefire99

---

### PROFILE SUMMARY

MCA (Data Analytics) student with hands-on internship experience in data analysis and reporting. Comfortable turning raw data into structured MIS reports and dashboards, with practical exposure to Python-based automation and SQL. Has independently built multiple end-to-end analytics and reporting platforms, translating data into clear, decision-ready views for non-technical stakeholders.

---

### WORK EXPERIENCE

#### Data Analysis Intern | Cognizant Technologies

Mar 2026 – Apr 2026

- Analyzed and cleaned datasets to support MIS-style reporting, identifying trends and anomalies for review.
- Prepared structured reports and summaries to communicate findings to project stakeholders.
- Worked with spreadsheets and data tools to organize and validate data prior to reporting.

#### Python Development Intern | The Developers Arena

Feb 2026 – Present

- Built Python scripts to automate repetitive data-handling and reporting tasks, reducing manual effort.
- Contributed to development tasks requiring attention to data accuracy and process consistency.

#### Business Development Executive | SIXPL

Jul 2024 – Sep 2024

- Achieved the company's first overseas sale within the joining period — independently identified the prospect, managed the full sales cycle, and closed the deal.
- Maintained organized pipeline and follow-up records, a discipline directly transferable to MIS tracking and reporting accuracy.
- Ran client discovery calls and translated business needs into structured proposals, building the stakeholder-communication skills MIS reporting depends on.

---

### RELEVANT PROJECTS

- TalentPulse AI — 7-page job-market intelligence dashboard (Streamlit, Plotly, scikit-learn) modeling India's tech hiring market with salary prediction and role recommendation, built on a 3,000-record dataset.
- RetentionIQ AI — customer churn prediction dashboard (Streamlit, RandomForestClassifier) designed with a SaaS-style reporting interface for at-a-glance business metrics.
- ApexF1 Intelligence Platform — analytics dashboard for race data and prediction modeling.
- CivicAssist AI — Streamlit + Gemini AI application that converts dense government/legal documents into plain-language summaries.

---

### EDUCATION

#### Master of Computer Applications (Data Analytics)

2024 – 2026

Jain University

#### Bachelor of Computer Applications

GL Bajaj Institute of Management & Technology

---

### SKILLS

- Data Analysis & Reporting — data cleaning, structured MIS reporting, spreadsheet-based reporting
- Technical — Python, SQL, Streamlit, Plotly, scikit-learn
- Dashboarding & Visualization — building end-to-end reporting dashboards from raw data
- Process — automation scripting to reduce manual reporting effort
